

TECHNICAL DATA SHEET

Acid Vapor Neutralizer Rust Preventive Bulk/Liquid 44001PB, 44005PB, 44055PB

Product Description

Acid Vapor Neutralizer Rust Preventive is engineered to protect stored molds and dies from corrosive attack by hydrochloric and hydrobromic acids, as well as most common atmospheric corrosives and fingerprint acids. Widely used in the manufacturing of PVC and flame-retardant resin products, this rust preventive is a one-step solution that doesn't require coating with a separate acid neutralizing product first. Duration of protection that is offered is dependent on amount of PVC and flame-retardant being molded.

Applications

Rust Preventive

Unit Package Description

1, 5 and 55-gallon containers

Generic Description

Rust Preventive

Approx. Net Weight Fill per Gal.

7 pounds

Net Weight Fill

1 - 55 gallons

Appearance

Brownish-tint Liquid

Odor

Mild, Petroleum like

Flash Point F

25 degrees

Flash Point C

Negative 4 degrees

Base Type

Petroleum

Evaporation Rate

Slow

HMIS Rating

2, 3, 0, X

DOT Proper Shipping Name

UN1206, Proper Shipping Name - Heptanes Solution, Hazard Class - 3, Packing Group - II

VOC % (Federal)

65

VOC g/L (Federal)

545.21

VOC lbs./Gal (Federal)

4.55

Removal

Remove with organic or hydrocarbon solvents

Units Per Case

1

Case Weight (lbs)

Various

Working Temperature F

32 to 350 degrees

Working Temperature C

0 to 176 degrees

Specific Gravity

0.698
